Mehran Sattary

Dot net Programmer

I'm Mehran Sattary, a 27-year-old software engineer from Tabriz, Iran. I hold a Bachelor's degree in Software Engineering from Payame Noor University, Tabriz. My journey in programming started back in 2018 when I began learning C# during my sixth semester. I continued my learning with ASP.NET MVC 5 and eventually transitioned to ASP.NET Core 7, which I'm currently working with.

I have worked on various freelance projects, primarily focusing on backend development. My approach involves customizing HTML templates to meet clients' requirements and building projects with ASP.NET Core MVC. In the past year, I've also delved into Microsoft's new technology, Blazor, which allows me to create single-page applications without the need for JavaScript-based page refreshes.
